HIGH-PERFORMANCE MACHINING WITHOUT THE HIGH COST OF OWNING.

San Francisco, CA
GOLDEN GATE BRIDGE
// seismic upgrade

CHALLENGE:

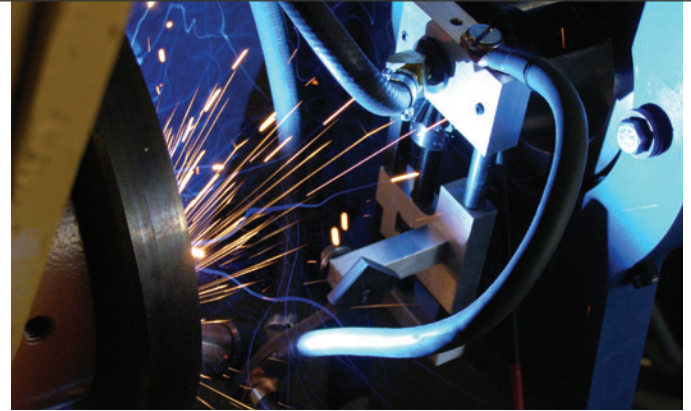

REPLACE THREE SUPPORTING STANDS WITH NEW STEEL STRUCTURAL FOUNDATION.

BB5000

In performing a major seismic upgrade project, contractors rented a Climax BB5000 Boring Machine to attach to the bridge's under-supports and drill eight 8 inch (203.2 mm) diameter holes through 4 inch (101.6 mm) thick steel plates—all while suspended 98 feet (30 m) above San Francisco Bay. The BB5000 can drill holes from 1.5 - 24 inches (38.1 - 609.6 mm) in diameter.

THE PAYOFF: *The entire job completed in fewer than four days; less than half the time originally allocated.*

A major success, thanks to a rental tool that performed in restrictive conditions, delivering maximum effectiveness with minimal cost.

500 POWERFUL TOOLS AT A PAINLESS PRICE.

Buying any tool, no matter how good, is difficult when you may use it only once or twice a year. But with virtually the entire inventory of Climax tools available as rentals, your toolbox is as big as you need it to be – without the upfront investment.

RENTALS STOCKED WORLDWIDE

Your regional Climax rental depots are like your own supply room. Talk to our rental specialists and applications experts to determine the perfect fit for each job with over 500 different machine tools. Rent it. Repair right on site. Return it. Take the small cost out of your operating budget – you won't even have to put in a capital request.

TOOLS THAT WORK FOR YOU

- Maximize your tool fleet's utility: Own what you use a lot; rent for special jobs or overload situations.
- Minimize risk by outsourcing product responsibility, legal compliance costs, and the costs of maintaining your tools.
- Assure yourself the latest portable machine tool technology while you cut the cost of service shops, spare parts and maintenance records.
- "Test drive" our tools before you buy to make sure they meet your needs.

JOB-SMART, BUSINESS-SAVVY

With low-cost, high-performance Climax rentals just a day away in many cases, you've got the perfect machine tool for each unique repair job – there when you need them, gone when you don't.

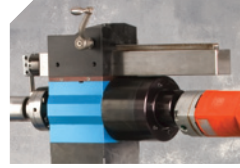

And when you're ready to buy? Save money with our reconditioned used equipment at great prices.

POWER TO SPARE

BORING MACHINES

Seven models and dozens of configurations to choose from, with boring diameters up to 80 inches (2032 mm). Compact, versatile, and the most powerful tools in their class.

FAST WORK IN TIGHT QUARTERS

PORTABLE LATHES

Our lathes mount directly to the work piece and rotate around the shaft. Cut O-ring grooves, repair spindles, or fix out-of-round gear seats with as little as 7 inches (177.8 mm) of radial clearance.

BORE AND WELD AT ONCE

BORE WELDING

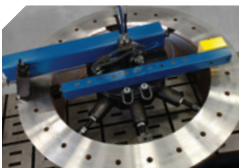

Both automated spiral and step welding systems are available. They attach to Climax boring machines to let you bore and weld with one setup or even simultaneously.

POWER IN ANY POSITION

KEY MILLS

These two-axis and three-axis mills cut keyways, slots, pockets, or flats on shaft diameters of 1.5 to 24 inches (38.1 to 609.6 mm). They can be operated in any position, thanks to their sealed gear box lubrication.

VERSATILITY UNLIMITED

FLANGE FACERS

Reface, bevel, counterbore or cut end prep configurations for welding, with easy set-up and OD or ID mounting. Pick from seven models with machining diameters up to 120 inches (3048 mm).

MAKING REPAIR PRACTICAL

GRINDING & LAPPING

Save valve inventory and replacement costs. Bore, turn, thread, face, machine weld preps and more using these ingenious repair tools you can select or configure for a huge variety of valves.

2- AND 3-AXIS OPTIONS

MILLING MACHINES

Highly configurable circular, linear and key mills are all available for rent. You can meet the most precise specifications, with easy set-up and fast metal removal.

FAST AND ACCURATE END PREP

PIPE BEVELING

We rent ID mount pipe beveling tools from 1 to 12 inches (25.4 to 304.8 mm). In addition, our smaller flange facers come with pipe beveling heads that bevel pipe accurately and quickly.

RENTAL TOOLS THAT CAN SAVE THE DAY. AND SOMETIMES WEEKS.

Vancouver, WA
PORT OF VANCOUVER, USA

// field machining

CHALLENGE:

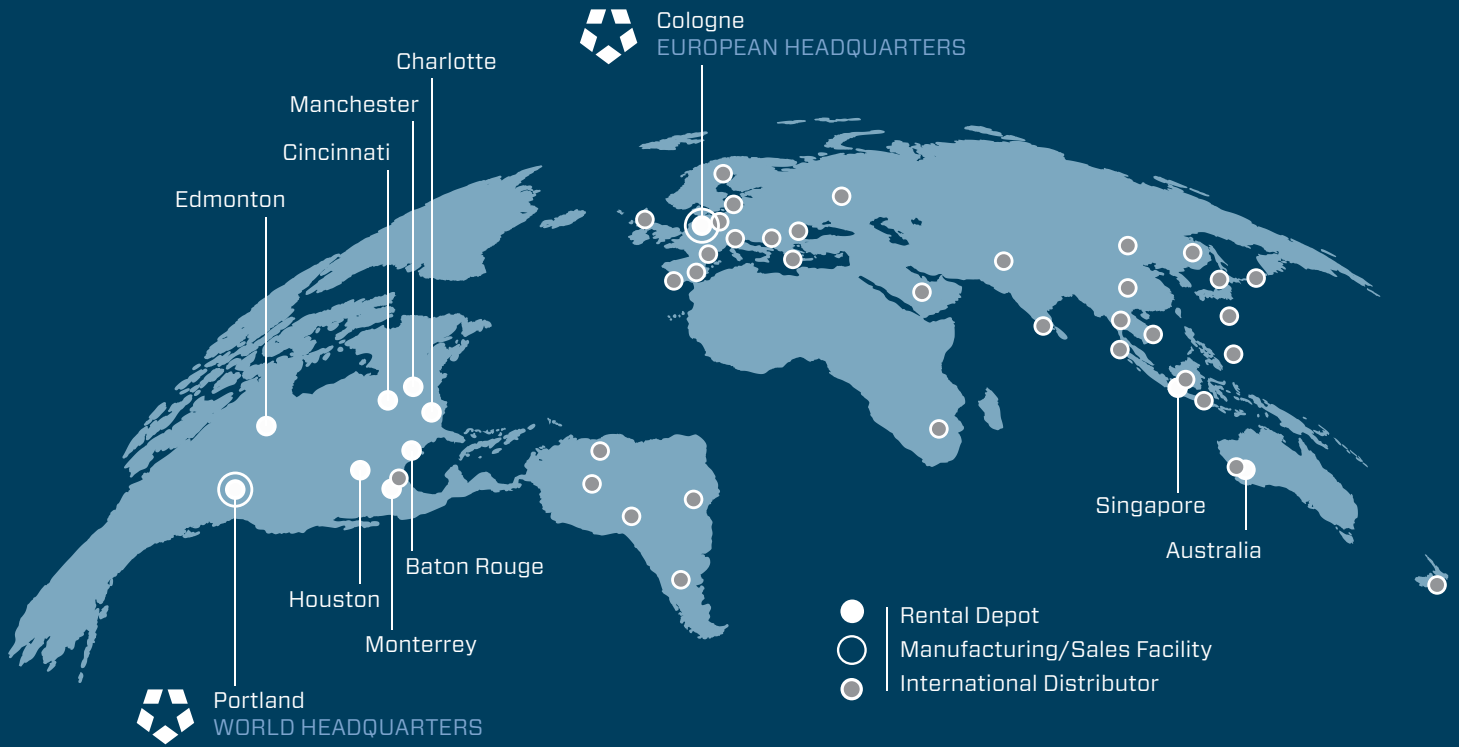

500 WIND TURBINE TOWER SECTIONS ARRIVE FROM OVERSEAS OUT OF SPEC.

Shipping a load of 500 out of spec wind turbine sections for machining off-site would spell disaster to the project's timeline.

Instead, the manufacturer hired a service company that rented two Climax FF8000 flange facers, each capable of fast and precise metal removal for up to 120 inch (3048 mm) welding diameters.

THE PAYOFF: All of the 8 foot (2.4 m) diameter flanges were rapidly restored to specified flatness tolerances right at the port of entry, saving huge time and expense and a possible customer rejection of the order.

FF8000

Climax Portable Machine Tool rental depots are strategically located throughout the world to reduce your freight costs and expedite delivery.

Contact us for the latest list of rental equipment and price lists. If you need selection guidance, training or on-site consultation, we're famous for it.
